

Suppressing the EDIT/VIEW Entry Panel in DSLIST (data set list)

A Data set list, created using ISPF option 3.4 or the DSLIST command, has its own settings. The EDIT/VIEW entry panel setting is particularly helpful. This post shows how to access DSLIST settings, suppress the EDIT/VIEW entry panel, and how to access the panel options when needed.

Watch this [QuickRef Academy video](#) to learn more

Using the DSLSET command or the Options menu choice DSLIST Settings... on a DSLIST display allows you to select several options, but the most visible is the Edit/View Entry Panel shown here.

```
